

FCC - To whom it may concern:

We live in an area poorly served by radio stations. Most are fuzzy and the majority of station can only be heard at night. XM radio has enriched our lives with news, weather, talk radio and music - none of which we could obtain in the daylight hours without it. Please do not limit the kinds of broadcasts available to my husband, myself and the many other people who use this as their main source of radio broadcasts received.

Thank you for your attention to this matter.

Respectfully submitted:

Kathy Hansen
